

Recap on attributes

14 April 2016 Committee workshop

What makes a good attribute?

- Relates to the value and to the issue being managed
- Can be robustly assessed or measured
- Not too costly or time consuming
- Is linked to changes in management, directly or indirectly
- Complements other objectives

What are we using attributes for?

- In order:
 1. For scenario testing
 2. To set objectives with
 3. To calculate limits
 4. To monitor into the future
- An attribute might be useful for some or all of these things...

What are we using attributes for?

Periphyton

Cockle health

Underfoot
squidgyness

Whaitua GDP

Smell

- For scenario testing

- To set objectives with

- To calculate limits

- To monitor into the future
