

**Places of interest?**

# **We (the modellers) will try to predict what various possible futures (scenarios) could look like...**

- The model building is now underway
- We know you are now designing the scenarios
- We know what to describe (your attributes)
- Tonight we want to check WHERE?

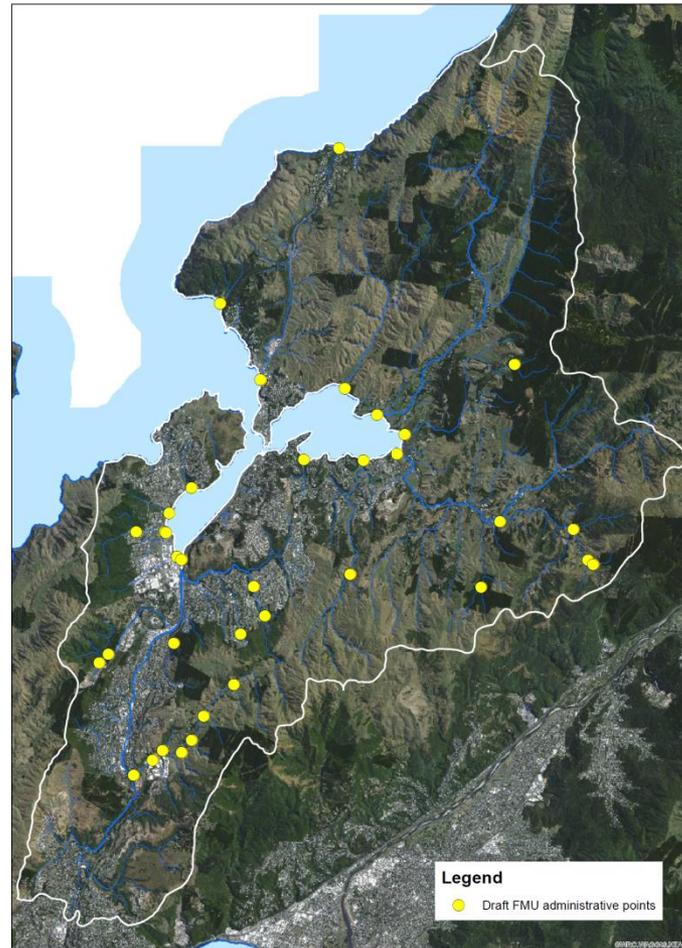

*Where – specifically – are you interested in?*

We will describe, for each scenario, ...

*“This is what we think will happen here... [detail]...”*

**Where would you like “here” to be?**

Starter FYI...  
Draft modelling  
points (based on  
draft FMU units)

# Add your thoughts to the maps – use stickies

**We want to know: 1) Where?  
2) Why there?**

For example think about spots of interest for...

- Recreation
- Amenity
- Cultural
- Ecology
- Both urban & rural
- Other places special to your community
