

**ENGAGEMENT INPUTS
COMMUNITY & STAKEHOLDERS**

COMMITTEE OUTCOMES

**COLLABORATIVE MODELLING
PROJECT INPUTS**

POLICY INPUTS

Stakeholder ideas for policy/management approaches

Learn about policy and identify draft preferences:
- Allocation regime
- Policy/management approaches

Draft objectives and freshwater management units

Draft limits and policy approaches

Stakeholders and community preferences and ideas for objectives and how to meet them

Community and stakeholders must have inputted to progress

Final objectives and freshwater management units

Final limits and policy approaches

Baseline and Business as usual results

Other modelling results as ready

All modelling results must have been inputted to progress

- Policy selection criteria
- Options for:
 - Water allocation
 - Discharge allocation
 - Non-allocation management
 - Institutions
 - Transitional arrangements

- Draft freshwater management unit map
- Freshwater objective template

- Policy package framework
- Options for range of take and discharge limits (alone and together) to achieve objectives
- Per freshwater management unit, business as usual:
 - Take limits and allocation
 - Discharge loads and/or concentrations
- Assessment of impacts on resource users

Whaitua Implementation Programme presented to Council
